a
composite
Innate immunity / Inflammation
outside modules
Translation / Ribosome
Protein processing in ER / UPR / mTOR signaling
Amino acid metabolism / Coagulation / Xenobiotic metabolism
Lipid metabolism / PPAR signaling
Nrf2 signaling / Proteasome
Interferon signaling
Fatty acid metabolism / Beta-oxidation
Apoptosis / Nrf2 signaling / Proteasome
Heat stress response
Muscle contraction / Cytoskeleton / Glycolysis
VEGF signaling
Cholesterol metabolism / Platelet degranulation
Oxidative phosphorylation / TCA cycle
Cholesterol metabolism / mTOR signaling
mRNA splicing
Chromatin modification (2)
Heme metabolism / ROS pathway / Mitochondria
Respiration / Mitochondrial translation
Adaptive immunity / T cell signaling
Cell cycle / DNA replication
ECM organization / EMT
Chromatin modification (1)
